DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-12, drawn to a seismic wave detector, classified in class 367, subclass 178.

II. Claims 13-27, drawn to apparatus and a method using at least three detectors for hydrocarbon exploration, classified in class 367, subclass 58 .

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombination and a combination. They are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as non-hydrocarbon detection, i.e. water. See MPEP § 806.05(d).

a) Because these inventions have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

b) Because the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

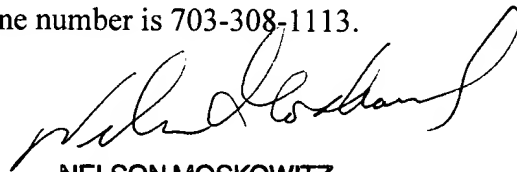

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nelson Moskowitz whose telephone number is 703-306-4165.
